

“The big advantage for ExPrep, from my perspective, has been the flexibility it gives me”

Tim Allen

- Finance Professor for about 28 years
- Using ExPrep 2.5 years (5 semesters)
- Publisher vs. ExPrep Comparison:
ExPrep flexibility is biggest advantage. Felt hands tied and students had to do what publisher content designed in a certain way. Publisher did things he didn't want to focus on, and canned routines didn't focus on things he wanted to focus on. ExPrep allows flexibility to focus on areas that he wants with own content the way he wants it

Problem

Many students getting to his class without knowing Excel. He had to teach Excel before even getting to the finance topics he wanted to cover

Solution

First week of class, they use ExPrep to prove they know Excel so that they can succeed in his course and get to finance topics he needs to cover

Result

Allow to design more complicated ExPrep projects without needing to grade anything himself. No longer a limitation and burden. Can now cover all the material he wants to go over in his class.

“The big advantage for ExPrep, from my perspective, has been the flexibility it gives me”

Tim Allen

(Continued)

- Loves the ExPrep training app and content. Doing a disservice if students leave school without Excel skills. Need to make sure students are prepped for interviews/jobs.
- Can pick areas they want to focus on through ExPrep Trainer. Combo with ExPrep Grader where they can then design and create assignments to do whatever they want with their topics.
