MISSISSIPPI STATE UNIVERSITY

ExPrep — Excel in your career

"**Students are getting all their good [Excel] basics from ExPrep and faculty is able to build on that**"

Angelia Knight

- Director of MBA Programs (On-campus and Online) for 30 years

- About 600 students in the program

- Using ExPrep for about 3-4 years. Started using the ExPrep trainer before Grader was launched

- **Insights from assessments taken:** Students think they're great in Excel until the data from ExPrep shows otherwise. They realize not so great in Excel as they thought. Able to gather this information through ExPrep

Problem
Curriculum was old and did not incorporate Excel. Needed to revise curriculum and knew Excel skills were required for jobs. ExPrep rose to the top comparatively because of the easy-to-do assignments self-paced work flow.

Solution
Students don't need to worry about using Excel as a tool and can focus on the actual course itself. Feeling much more prepared and talking a lot about ExPrep, even in interviews.

Result
Been very positive because students coming out of program more confident in their skills. ExPrep gives students a really good foundation in Excel and they don't have to think about how to do something in Excel in class and can actually focus on what the professor is saying.
