"Post ExPrep, there's virtually no grading time"

Courtney Edwards

- Accounting Tax Professor in Masters of Accounting Program

- Using ExPrep since 2018 with about 120-140 students per term

- Other software programs (competition) take the thinking out of the process which is why she wanted to create her own content

Problem

Large projects in Excel created grading nightmare. Hard to give feedback to students. Super time consuming; 60-70 project files taking about 30 min per file (30-40 hours for one project and had groups)

Solution

ExPrep automated grading and feedback; after instating ExPrep, less time was allocated towards course work.

Result

Able to create more projects and custom to what she wants to build/teach.
